Mo Lovegreen is the founding director for campus sustainability at the University of California, Santa Barbara and is also the Executive Officer in the Department of Geography where she coordinates with the IT staff on developing components for the Interactive Campus Map (ICM). Mo manages the 10 Sustainability Change Agent Teams/subcommittees and serves as an advisor to the Chancellor’s Sustainability Committee and the Academic Senate Working Group on Sustainability. Mo supervised the design, construction and “greening” of Donald Bren Hall - the first laboratory building in the United States to achieve the U.S. Green Building Council’s Leadership in Energy and Environmental Design (LEED™) Platinum rating.
